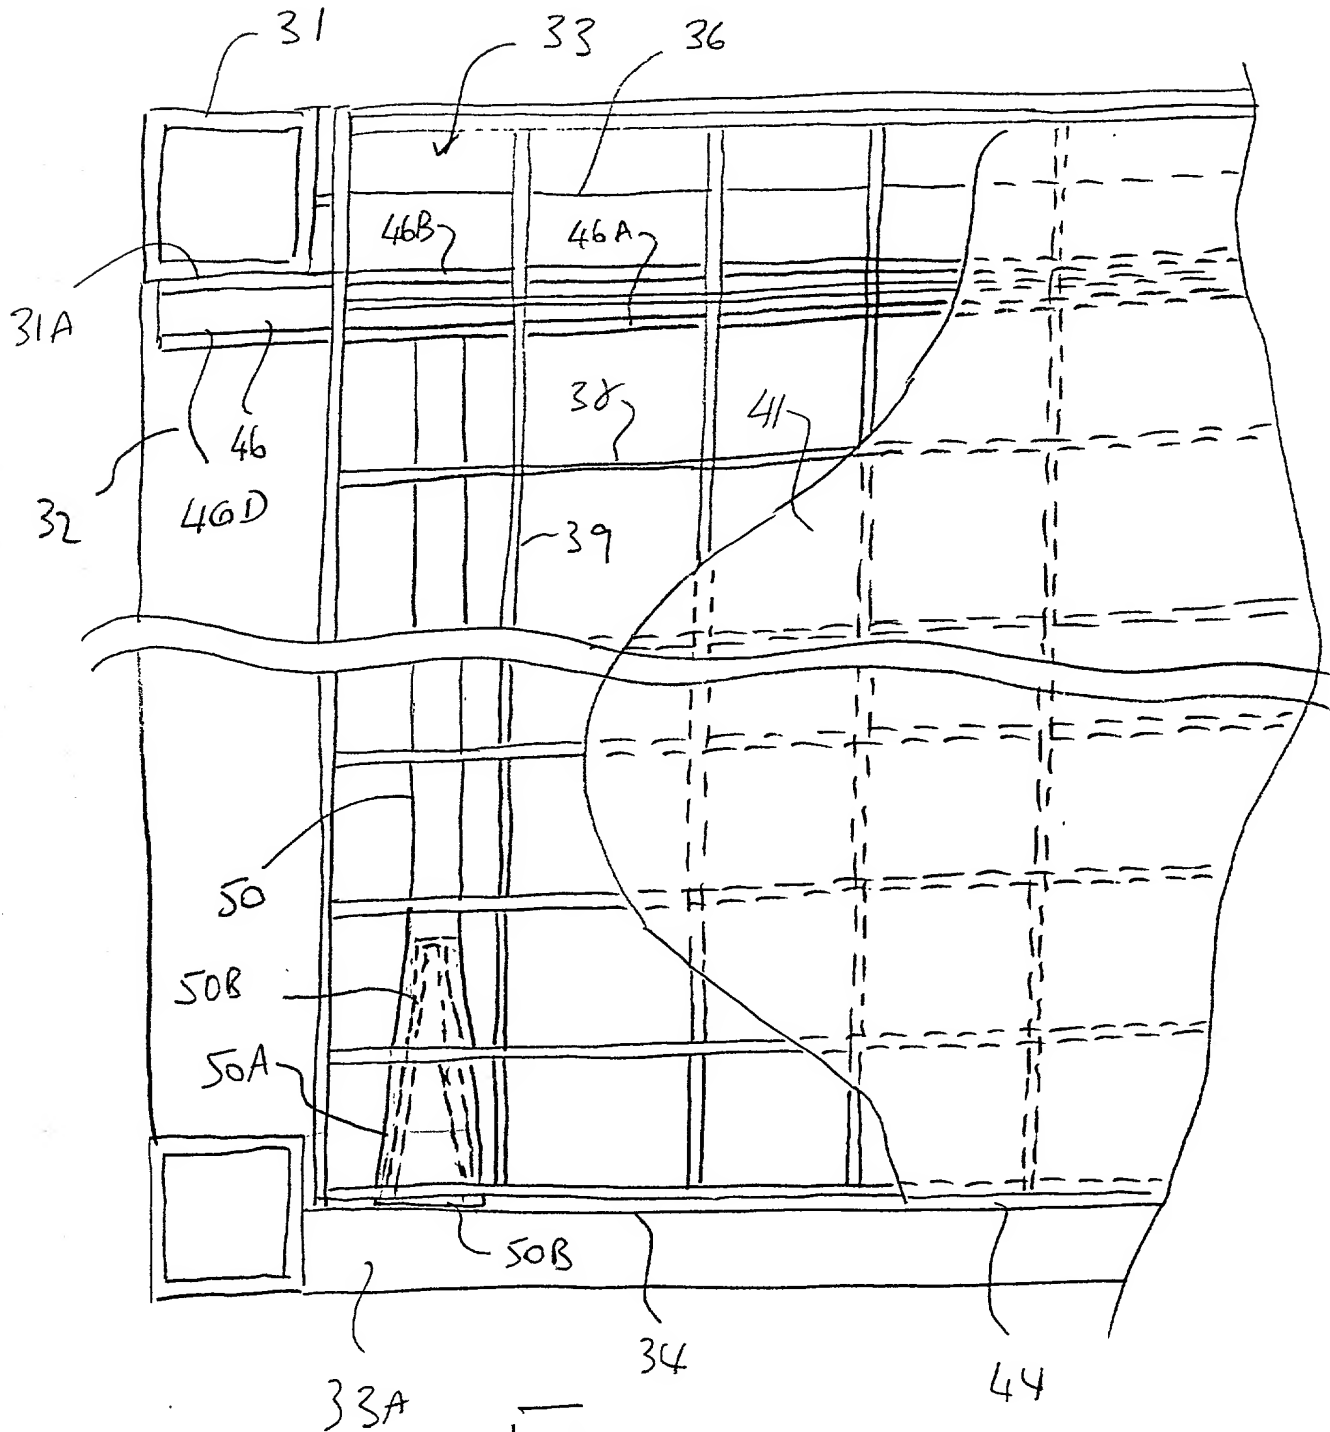

FIG. 6

71

A hand-drawn schematic diagram of a grid structure, likely representing a window or a display panel. The diagram shows a grid of rectangular cells. A thick horizontal line divides the grid into two main sections. On the left side, there is a vertical strip containing a small square at the bottom. Various parts of the grid are labeled with numbers: 31 points to the top-left corner; 34, 33, 52, 38, and 37 point to different horizontal and vertical lines within the grid; 45 points to the left vertical strip; 44 points to the bottom horizontal line; and 41 points to the bottom-right corner. The drawing is done in a sketchy, hand-drawn style with black lines on a white background.
